Domain Report

The Domain Report identifies the top origins of visitors to this site. This is determined by the suffix of their domain name. Use this information carefully as this is based on where their domain name is registered and may not always be an accurate identifier of the actual geographic location of this visitor. For example, while most .com domain names are from the United States, there are a growing number of .com domain names that exist outside the United States.

This report shows all results. This report is sorted by amount of bytes transferred.

Organization Report

The Organization Report attempts to list the organizations (companies, institutions, ISPs etc.) whose computers accessed your site. In general this is similar to the Domain report but shows the servers one level up in the name-tree. This report can also show a hierarchy of servers within an organization. For example aol.com has many proxy-nnn.aol.com servers.

This report shows the first 20 results by number of requests. This report is sorted by number of requests.
