

Ebenhaeser Alien Invasive Plant Clearing

IWRM Objectives – Water use efficiency, alien invasive plant eradication and awareness, empowerment & capacity building

The Ebenhaeser Alien Invasive Plant Eradication project cleared a total of 4.7 km along the Ebenhaeser Irrigation Canal.

The project leader participated in the first phase of IWRM, obtaining training as a Water Forum Champion / Mentor and obtaining seed funding to kick-start a project on water awareness in Ebenhaeser.

IWRM budget was allocated a budget of R102,112 and spent in this project R89,572 with most of the budget used on labour and the purchase of equipment.
