

Krom Antonies Water User Association

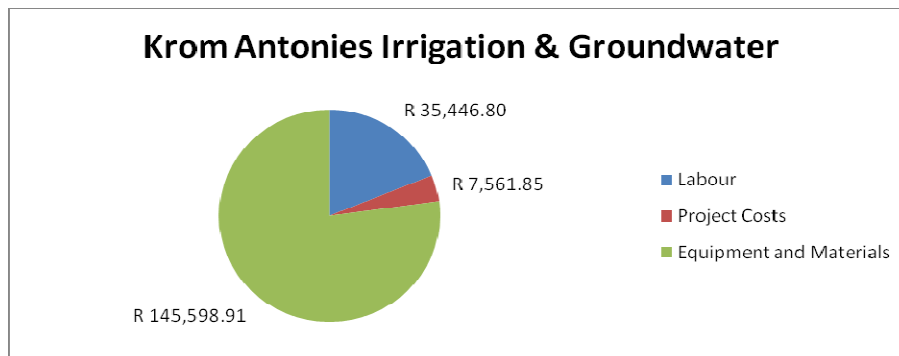

IWRM Objectives – Water management institutions, groundwater, capacity building and empowerment

The Krom Antonies Water User Association is a newly formed association with the task of managing water resources within the Krom Antonies region of the West Coast. The association proposed a project for irrigation scheduling and groundwater monitoring. This pilot study involved a total of monitoring water use on six farms in the area.

The WUA participated in the IWRM Quarterly Project Monitoring Group meetings and various capacity building initiatives, notably the IWRM Groundwater Training for Pump Operators (based on the DWAF NORAD training materials).

Financial Information for Krom Antonies Water User Association (WK10)

The Krom Antonies WUA - Groundwater Monitoring was awarded a contract named IWRMII-WUA-OD-WK10-002 in 2008 to the value of R188,607.56. R188,607.56 was spent in the given contract period and the project closed at the end of August 2009.

Of the budget allocated to this group, R145,598.91 was spent on materials and equipment to build the operations, R35,446.80 was allocated to wages and payments for work done on project tasks, and R7,561.85 was claimed to support the project management and administration tasks undertaken by the group.

The project's funds were augmented by R60,000 in 2009 to accommodate the groundwater monitoring installations for the Krom Antonies Area proposed and implemented by the Department of Agriculture to monitor groundwater quality and quantity.
