Website statistics for iwrm.co.za

30 July 2008

Compiled by informage CC

Please find the website statistical report for www.iwrm.co.za for the period July 2007 to July 2008. You will notice that the number of visits to the site and traffic has increased tremendously over the past few months, since Water Week 2008 (see graphic in monthly report).

It is furthermore interesting also to note that iwrm.co.za is attracting substantial interest from across the world, specifically the UK, Australia, Netherlands, Germany, Switzerland, Italy, Belgium, Denmark and China, and from countries in Southern African, namely Zimbabwe, Botswana and Namibia.

Top requests from the website are for:

- Viability of CMA Mvoti-Mzimkulu WMA Case Study (from IWRM I) with 626 requests,
- Olifants-Doorn Project Compendium of 521,
- Vol 2 Technical Report Water Conservation Umgeni Municipality Pilot (IWRM I) 303,
- Olifants-Doorn Newsletter Afrikaans 298,
- Olifants-Doorn Newsletter English 287,
- Vanrhynsdorp Emerging Farmer write-up 284,
- IWRM I Champion Module on Communication & Conflict Resolution 269
- Groundwater Awareness (IWRM I) 209
- IWRM I Toolkit for Public Participation 207

It is interesting to note that many of the IWRM I guideline resources are being downloaded.

We expect the website to become even more popular once;

- the meta-words are loaded (will enable search engines to find our website easier),
- we get the link from www.dwaf.gov.za operational (we had quite a few referrals from eWisa website),
- more projects and document resources get loaded especially from the other regions.

General Summary

The General Summary provides a quick overview of the general statistics for the entire web site during the report time frame.

8.	Most popular operating system	**OS unknown**	4,949	36.02%

Monthly Report

The Monthly Report identifies activity for each month in the report time frame. Remember that each page hit can result in several server requests as the images for each page are loaded.
Note: Depending on the report time frame, the first and last months may not represent a complete month's worth of data, resulting in lower hits.

Domain Report

The Domain Report identifies the top origins of visitors to this site. This is determined by the suffix of their domain name. Use this information carefully as this is based on where their domain name is registered and may not always be an accurate identifier of the actual geographic location of this visitor. For example, while most .com domain names are from the United States, there are a growing number of .com domain names that exist outside the United States.

This report shows all results. This report is sorted by amount of bytes transferred.

Organization Report

The Organization Report attempts to list the organizations (companies, institutions, ISPs etc.) whose computers accessed your site. In general this is similar to the Domain report but shows the servers one level up in the name-tree. This report can also show a hierarchy of servers within an organization. For example aol.com has many proxy-nnn.aol.com servers.

This report shows the first 20 results by number of requests. This report is sorted by number of requests.
